Fabtech 2007 International Trade Show

Nov. 11th – 14th at McCormick Place, Chicago, IL. USA

Horn Machine Tools, Inc, at booth #20081 will display the best designs of tube bending machines from three continents, North America, Asia and Europe. It's going to be very exciting to watch the latest technologies from three of the most progressive tube bender companies.

We will feature:

- 3" CNC Tube Bender with Robotic Tending and Camera Vision System
- 75mm Left-Hand/Right Hand Multi-Stack All Electric Bender
- 76mm Multi-Stack All electric Bender
- 38mm Twin Head All Electric Bender
- 30mm Robot Bender with secondary operations
- 38mm Hybrid Multi-stack Bender

A FANUC M-710iC/50 robot will perform load / unload operations on the Horn 2E CNC Tube Bending machine. Utilizing quick change tooling, the robot will have the flexibility to exchange the tube handling end effector for a vision system camera. The robot will use the vision system camera to perform inspections on the bent tube and transfer the data to the bending machine. Tube bending machines coupled with robotic machine tending can help manufacturers improve productivity, quality and profitability.

The HORN METRIC 75EMR Left-Hand/Right-Hand All-Electric CNC bender will be debuted
This multi-stack machine can bend, roll and flip directions on the fly.

World Leaders In Tube Bending Technology

Unison will have a all electric 76mm Multi-Stack Bender, a 38mm Twin head 5 axis bender and
a new 30mm robotic bender with secondary operations.

It's going to be a great show; we look forward to meeting you there!

Booth #20081

Best regards,

Kent Horn
