HMT Contract Award

Marinette Marine Corporation

(MMC), a Fincantieri Company, has awarded HMT a contract for over \$1m to supply new CNC tube bending equipment, tooling, advanced development software and training.

The HMT #6 CNC bender and HORN Metric 80TSR cnc tube bender will be used to form shipyard piping for a variety of vessels they manufacture. The CNC bending machines software will be able to directly import files from the "Shipconstructor" software used by MMC to develop pipe details.

Further information can be seen at:
