All Electric Unison CNC BENDERS IN STOCK

Unison 76mm Multi-Stack Bender – 3” Capacity

Equipped with:

- All Electric Servo Driven
- Servo Pressure die assist
- Servo Mandrel Extractor
- 1 mandrel rod
- 3 stack Wiper Die Base
- Unibend V9 Windows CNC
- 3D tube graphics
- Triple stack tooling
- Machine lubricator
- Operation and Maint Manuals
- RH or CW rotation
- Carriage boost- Roll bending
- 3 days training at factory

The Unison Breeze series is a fully all electric CNC bender equipped to make tight radius bends on most materials and applications. The machine’s advanced CNC control can store part programs and recall for automatic set-up. This Windows based system uses a standard Dell PC with network connections. The machine can also perform roll bending for large radius applications.

Unison 16mm Multi-Stack Tube Bender- 5/8” Capacity

Special Price Demo Machine

The Unison Breeze series is a fully all electric CNC bender equipped to make tight radius bends on most materials and applications. The machine’s advanced CNC control can store part programs and recall for automatic set-up. This Windows based system uses a standard Dell PC with network connections. The machine can also perform roll bending for large radius applications.

Equipped with:

- All Electric Servo Driven
- Servo Pressure die assist
- Servo Mandrel Extractor
- 1 mandrel rod
- Unibend V9 Windows CNC
- 3D tube graphics
- Triple stack tooling
- Machine lubricator
- Operation and Maint Manuals
- RH or CW rotation
- Carriage boost- Roll bending
- 3 days training at factory

Unison 30mm Twin Head 5 Axis Tube Bender- 1” Capacity

The Unison TWIN series is a fully all electric CNC bender equipped to make compression bends on most materials and applications. The machine’s advanced CNC control can store part programs and recall for automatic set-up.

Equipped with:

- All Electric Servo Driven
- Servo position bend heads
- Servo tube rotation
- Unibend V9 Windows CNC
- 3D tube graphics
- single stack tooling
- Machine lubricator
- Operation and Maint Manuals
- 3 days training at factory

These machines are ready for immediate delivery as of 12/11/07.
