HMT #6 CNC Bender

Capacity: 6" Sch 80 pipe or 8" tube

Design Features:

- Equipped with BendPro G2 control system
- Heavy duty all steel weldment design, no castings.
- Oversized bearings in bend head for rigidity.
- Linear bearing pressure die assist with programmable controls.
- Reverse acting mandrel extractor.
- Low profile design, keeps work height & close to floor.
- Parker hydraulic system with independent pump for PDA
- Allen-Bradley Electric system.
- High output 50hp hydraulic system with proportional controlled bend arm, smooth & accurate operation

HMT #6 CNC Bender

Large Force Capacity Collet Indexing System

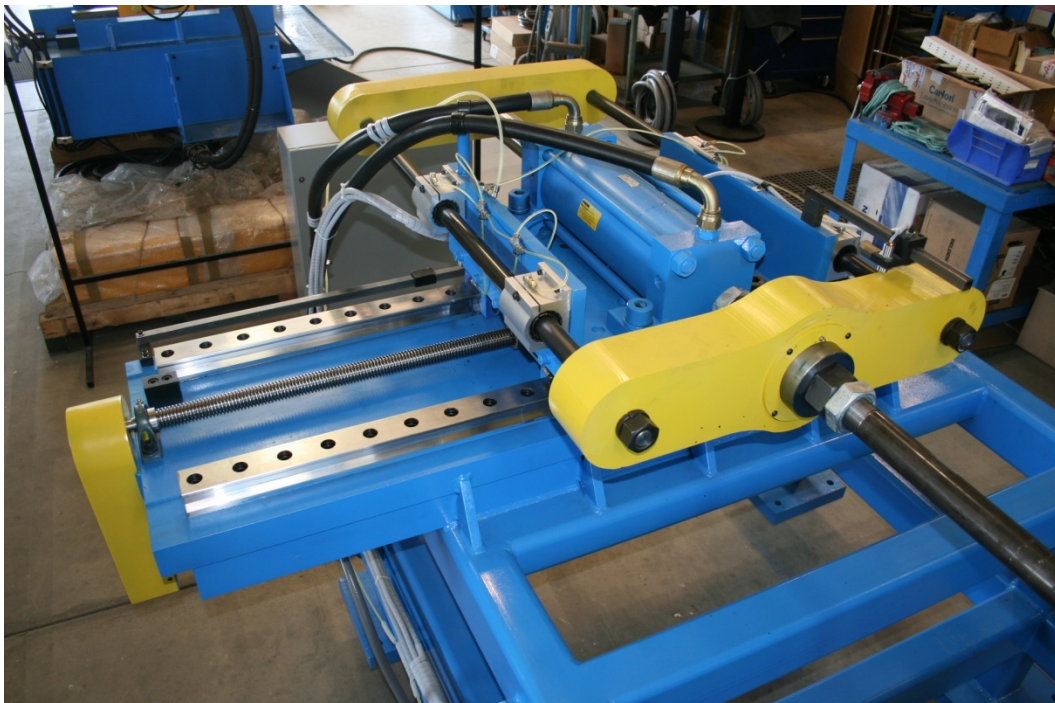

50 hp main hydraulic drive & 30hp independent PDA

HMT #6 CNC Bender

**Inline Pressure Die assist with Servo following.
Automatically matches the speed of the bend die**

Reverse Acting guided mandrel extractor
